STABILITY & EXPERIENCE

- 150 years of history
- Swiss company with global presence in over 50 countries
- European market leader in the field of sanitary products
- Over 10,000 employees worldwide

RELIABLE & SUSTAINABLE PRODUCTS

- Durable and reliable products, developed for decades
- Easy maintenance
- Long-term availability
- Economical use of water

KNOW-HOW & QUALITY

- Extensive in-house research and development initiatives
- Over 160 new patents from 2020 to 2024
- 120,000 stakeholders trained worldwide per year

DESIGN MEETS FUNCTION

- Passion for design and technology
- Elegant design and outstanding functionality of products
- Easy to clean, easy to use and increase of comfort

OUR COMMITMENTS TO TAKING RESPONSIBILITY IN THE SANITARY INDUSTRY

“SUSTAINABILITY HAS BEEN AN INTEGRAL PART OF GEBERIT CULTURE FOR SEVERAL DECADES. OUR FOCUS IS ON CONSTANT AND CONSISTENT IMPLEMENTATION WITH MEASURABLE RESULTS.”

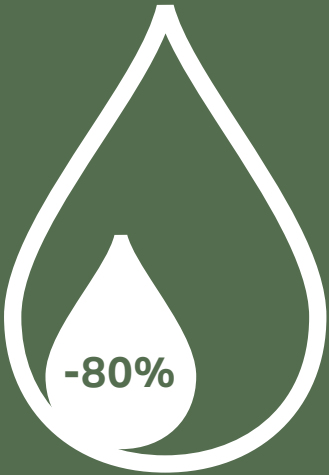

Christian Buhl, CEO

Photo: Reflections of the Swiss mountain lake Laghi d’Orsirora at 2,442 m above sea level, captured by photographer Bruno Augsburg (image mirrored).

Our expertise is based on a comprehensive understanding of how water flows and how it can be used safely and efficiently. In this way, we continuously refine our products and set new standards in order to make the everyday lives of people better.

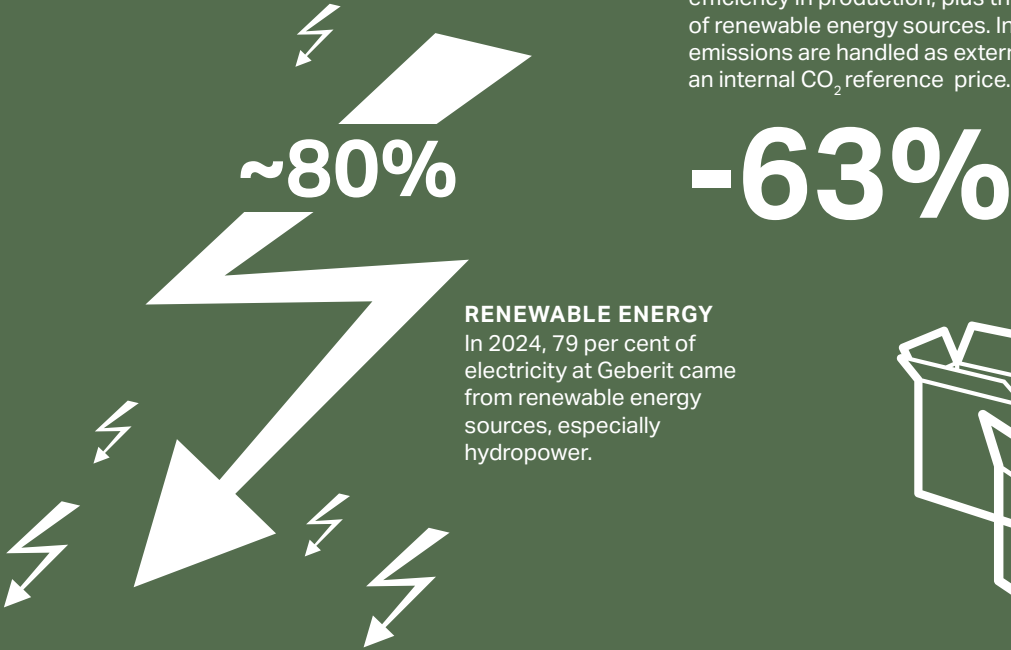

Across all sectors and countries, Geberit is in the top 5 per cent of companies rated by EcoVadis. Thus, Geberit has been awarded the EcoVadis Gold Medal.

SAVING WATER
Thanks to Geberit dual-flush and flush-stop cisterns, it now takes much less water to flush the toilet than it used to. According to a model calculation, water consumption for toilet flushing has decreased by around 80 per cent since the 1950s – from 70 litres to 14 litres per person per day.

Assumptions: One person uses the toilet five times a day and actuates the large flush once and the small flush four times.

ENERGY AND CO₂
With our CO₂ strategy, we set ourselves ambitious goals. Group wide CO₂ emissions in relation to currency-adjusted net sales should be reduced by 5 per cent per year. If Geberit reaches this target, relative CO₂ emissions at the company will be reduced by around 80 per cent by 2035 compared to 2015, when the ceramics business was acquired. We focus on specific measures for saving energy and improving efficiency in production, plus the selective purchasing of renewable energy sources. In addition, CO₂ emissions are handled as external costs by means of an internal CO₂ reference price.

Reduction of CO₂ emissions in relation to currency adjusted net sales (CO₂ intensity) since 2015

RENEWABLE ENERGY
In 2024, 79 per cent of electricity at Geberit came from renewable energy sources, especially hydropower.

LESS PACKAGING MATERIAL
Geberit’s packaging strategy aims to reduce packaging material by 10 per cent by 2030 compared to 2023. By then, plastic packaging must contain at least 35 per cent recycled material.

ADDITIONAL INFORMATION
Comprehensive information and key figures can be found in the Geberit sustainability report:
www.geberit.com/sustainability

ECODESIGN

FOR **ADDED VALUE**

**Sigma20
Actuator plates**

- Mounting frame for actuator plates: ABS plastic, 100% recyclable
- Actuator plate: 100% recyclable

**Type 383
Fill valve**

- Centralised logistics, short transport routes
- Spare parts availability: 50 years, backwards compatible

**Type 212
Flush valve**

- Reduction of flush volume to 2 litres
- Spare parts availability: 50 years, backwards compatible

**WC ceramic
with TurboFlush**

- Natural resources: Quartz, kaolin, feldspar, clay
- A clean flush even with minimal water usage, thanks to our efficient TurboFlush technology.

**Duofix
Installation element**

- Environmental product declaration (EPD) available
- Material savings and 10% less CO₂ emissions compared to the previous model
- Designed to be disassembled, allowing the components to be recycled

This graphic illustrates the Ecodesign principle using the example of a typical Geberit product group: a WC system. The Geberit iCon Rimfree WC with the flow divider made of 69 per cent recycled ABS plastic is installed on the Geberit Duofix mounting frame 111.300. In the Geberit Sigma concealed cistern 12 cm, the type 212 flush valve ensures a reduction in water consumption. The flush is actuated by the recyclable Geberit Sigma20 actuator plate, which is mounted in a frame made of 100 per cent recycled ABS plastic.

For many years now, Geberit has been committed to ensuring that every new product should be ecologically better than its predecessor in a bid to conserve natural resources.

Geberit has set itself the goal of creating added value for customers, the environment and society with its resourcesaving and durable products. The key to this is eco-design. Since 2007, the company has been consistently developing its products on the basis that every product should be ecologically better than its predecessor, without compromising on quality, functionality or durability. All stages of the product life cycle are taken into consideration for this assessment, from raw material extraction to disposal.

WATER CONSUMPTION IN FOCUS

Geberit has a long tradition of manufacturing products that save water. Rimless ceramics, optimised TurboFlush technology and flush valves, not to mention water-saving taps and urinals, are all designed to help customers use water resources more sparingly. Thanks to innovative Geberit sanitary products such as dual flush or stop-and-go cisterns, the average water consumption for flushing the toilet has fallen by around 80 per cent since 1952, from 70 litres to 14 litres per person per day, according to a model calculation.

REQUIREMENTS

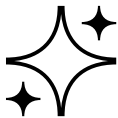

SANITARY PRODUCTS FOR EVERY NEED

WHAT FEATURES
MATTER MOST
IN YOUR BATHROOM

With Geberit products and systems, you can rely on that everything fits together. Geberit offers products for your bathroom that are specially tailored with different needs in mind.

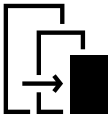

DESIGN
A reduced and timeless aesthetic that can be easily combined – for those looking for modern elegance and a wide range of colours and materials.

CLEANLINESS
Clever products that remain virtually dirt-free and are easy to clean – for those who want to minimise the amount of cleaning.

EASE OF USE
Products that are intuitive and easy to use – for those who like to be safe in the knowledge that they are enjoying optimal functionality after a bathroom renovation or conversion.

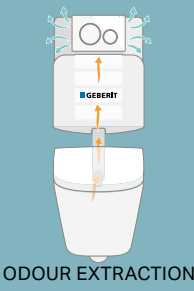

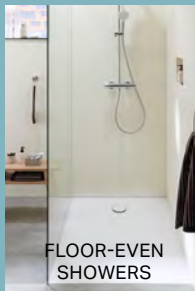

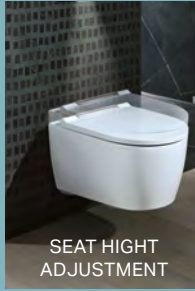

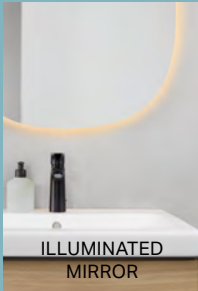

SPACE-SAVING
Clever functions and products that create space – for those who don't want to compromise on functionality or storage space.

COMFORT
Products that bring comfort and hygiene to the bathroom – for all those looking for extra freshness, well-being and cleanliness.

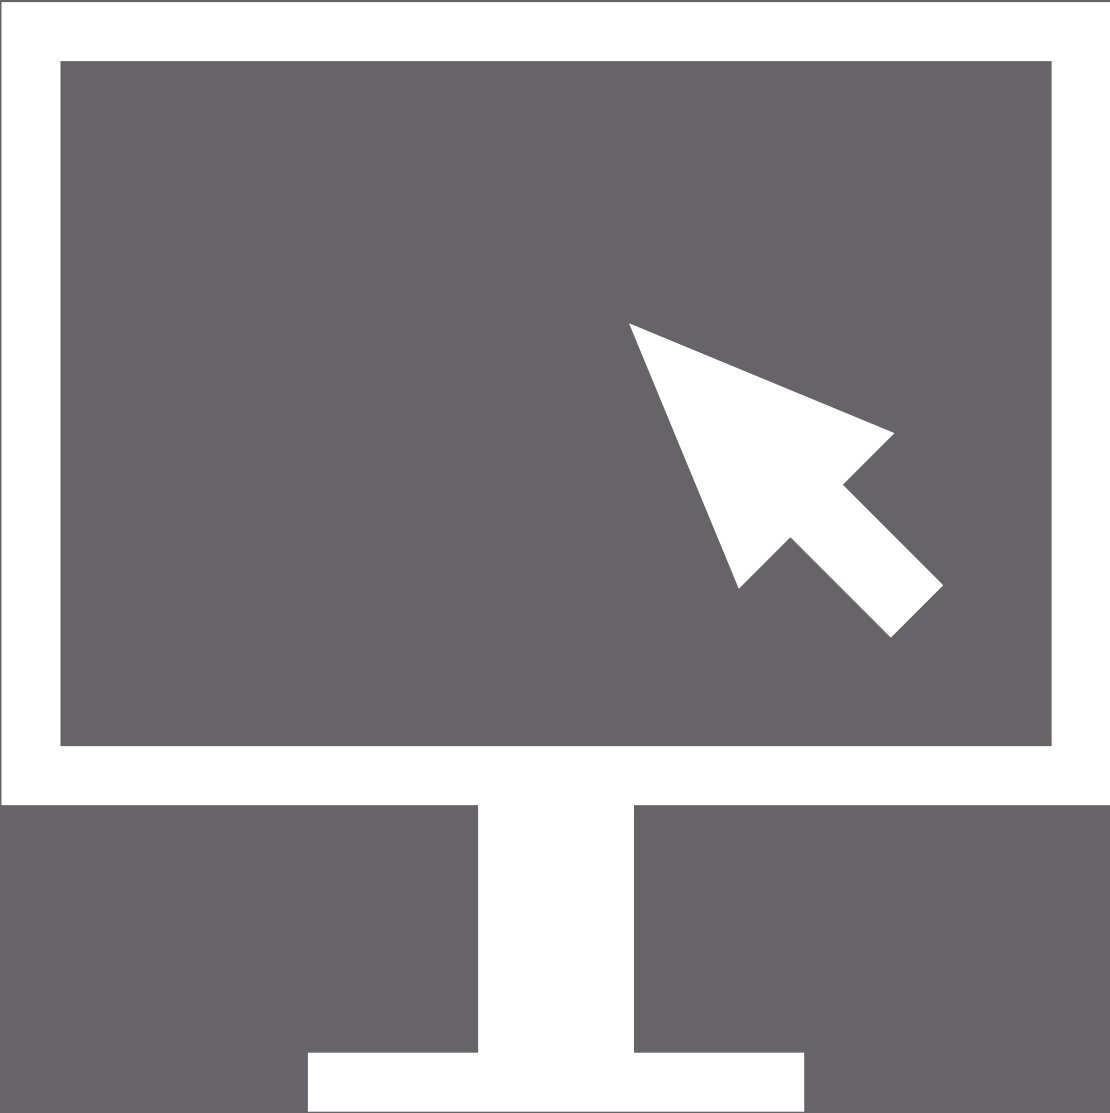

ACCESSIBILITY
Easily accessible, barrier-free bathrooms – for those who would like a universal design regardless of their age or specific needs.

DESIGN	CLEANLINESS	EASE OF USE	SPACE-SAVING	COMFORT	ACCESSIBILITY
 ACTUATOR PLATES	 TURBOFLUSH TECHNOLOGY	 COMFORTLIGHT	 WALL-MOUNTED TAPS	 ODOUR EXTRACTION	 FLOOR-EVEN SHOWERS

WCS WITH TIMELESS DESIGN

Toilets from Geberit feature a timeless, rimless design along with a particularly powerful and precise flush. In addition to design, other major decision-making factors when selecting a WC ceramic appliance include hygiene and ease of maintenance. The area beneath the flush rim is an ideal hiding place for germs, dirt and deposits to build up, which is why Geberit offers rimless WCs. Designed entirely without a rim, there are no hidden or hard-to-reach places where deposits could build up and create unwanted odours.

THE GEBERIT WC SYSTEM

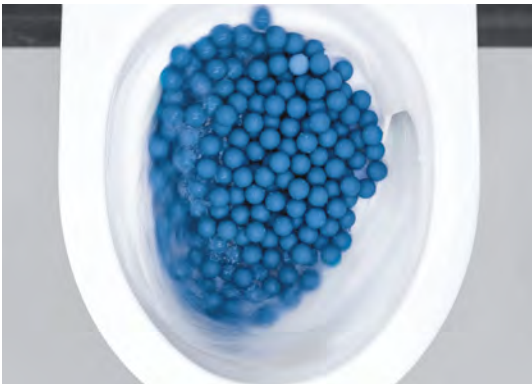

A MILESTONE

The Geberit WC system offers clear benefits thanks to the seamless coordination of all components – from the concealed cistern technology behind the wall to the ceramic appliance in front. Installers and toilet users alike are simply blown away by the outstanding functionality.

The Geberit WC system comprises the Geberit cistern and Geberit WC ceramic appliance to provide outstanding flush performance that is up to 10 times better than the European standard requirement.

Geberit develops WC systems that optimise the entire water circuit from the cistern to the WC and into the discharge pipe. In this way, the energy from the cistern is converted into an exceptional toilet flush. A powerful vortex achieves full-surface flushing of the rimless ceramic, offering a flushing-out performance that is particularly thorough and quiet.

Required flush performance according to the DIN EN 997:2018 standard

Geberit WC with TurboFlush: up to 10 times better than the standard

BETTER FLUSH PERFORMANCE
The flush test shown with 500 standardised plastic balls is representative of the overall result of all 13 tests conducted by Geberit, which result in a flush performance that is up to 10 times better.

LOW-NOISE FLUSHING SYSTEM
The optimised hydraulics of the flush and fill valves and the TurboFlush ceramic appliance with its unique inner geometry ensure that the toilet flushes out as quietly as a whisper.

Variety of designs

COMPREHENSIVE DESIGN OPTIONS
Choose from a variety of designs, materials and colours to find the perfect actuator plate for your bathroom and style. Such as the Geberit Sigma40 actuator plate, which impresses with its minimalist, modern look and its depth of just 4 mm.

GEBERIT WC SYSTEM

QUALITY CONNECTS

PROVEN QUALITY AND LONG-TERM
SPARE PARTS AVAILABILITY*

**TRIED AND
TESTED**

50

**YEARS OF
SPARE PARTS
AVAILABILITY**

* Geberit guarantees the flush function of its WC concealed cisterns for 50 years. The specific functionalities of electronic products (e.g. hygiene flush unit or DuoFresh) are excluded.

Scrutinised under the microscope:
Rigorous testing in our own laboratories.

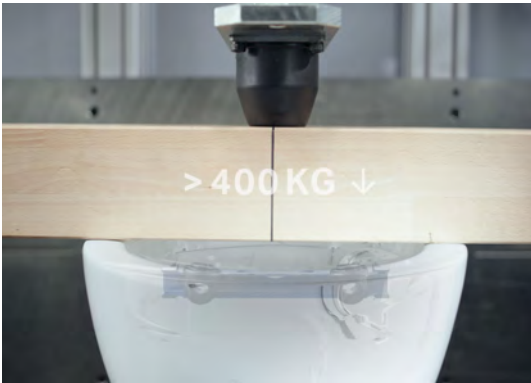

At Geberit, we channel our comprehensive expertise into developing and testing our products. We prioritise responsible manufacturing processes every step of the way, craft our products from the highest quality and most durable materials, and deliver them only after rigorous quality inspections. This is why we offer our customers 50 years of spare parts availability for all-round peace of mind. Because Geberit is a name you can rely on.

↑
CERAMIC CHECK
Geberit ceramics undergo strict quality controls after production before they are sent to our customers.

↑
HYDRAULICS EXPERTISE
Geberit's sanitary technology laboratories put flush and fill valves through their paces to demonstrate maximum hydraulic performance and pass long-term durability tests.

↑
LOAD TESTS
Geberit ceramics must pass stringent load tests and reliably fulfill all relevant standards.

↑
PRESSURE TEST
The components for flush actuation must be able to withstand at least 200,000 actuations, corresponding to a service life of around 50 years.

GEBERIT CONCEALED SOLUTIONS

THE TRADITION OF HIDING CISTERNS

In solid and drywall construction, the Geberit concealed cistern is the heart of millions of concealed installations in bathrooms. Every detail of this product is ingenious and has been proven a million times over. Plumbers and endusers have trusted the one-piece leak-proof cisterns from Geberit for more than 60 years.

- >60**

EVENTFUL HISTORY
Geberit has more than 60 years experience in the field of concealed cisterns. Since 1964 Geberit is working on product improvement and has constantly developed the quality and functionality of the cisterns.
- ★★★★**

PREMIUM QUALITY
All products from Geberit are known for their very high reliability and durability. Proven Swiss technology for decades.
- 👍**

TRIED AND TRUSTED
The Geberit concealed cisterns have been installed worldwide, millions of times.
- 🌿**

LEAKPROOF
Every single cistern one-piece blow-mould and is tested on its leak-tightness before it is leaving the factory.
- 👁️**

BEAUTIFUL DESIGN
A concealed solution with a wall-hung WC and beautiful actuator plates offers a lot of design options for your bathroom.
- 50 Years**

50 YEARS SPARE PARTS AVAILABILITY
Geberit guarantees 50 years spare parts availability, on all replaceable mechanical parts of the concealed cistern, except for electronic product functions (e.g. DuoFresh)
- 💡**

INNOVATIVE AND FUNCTIONAL DESIGN
Actuator plates are available in an easy-to-clean coated option, in a vandal-proof, screwable version and almost all Sigma actuator plates can be combined with an odour extraction unit.
- APP**

DIGITAL HELPERS
Easy planning with Geberit BIM data and ProPlanner. Recognising older products with the Pro App and directly ordering spare parts.
- 🏠**

WITHSTANDING HEAVY LOAD
The Geberit wall-hung solutions are designed and tested to withstand weights of 400 kg.
- 🏢**

INSTALLATION SYSTEMS
Available for all Geberit installation systems: Duofix, GIS and Kombifix.
- 💧**

SAVING WATER
The water consumption can be sustainably reduced with a Geberit dual flush actuation for the WC.
- ⚡**

ELECTRIC CONNECTION
The cisterns are prepared for a hidden or visible electric connection in case you want to upgrade your WC.
- 🚪**

OPENING SPACE
As soon as the sanitary technology hides behind the wall, a new feeling of space is created. A wall-hung solution offers more freedom in your bathroom.
- 🚿**

GEBERIT AQUACLEAN SHOWER TOILETS
Perfectly prepared for the installation of Geberit shower toilets with innovative comfort-functions.
- 🧼**

EASY TO CLEAN
The fewer edges, joints and corners, the simpler to clean and more hygienic.
- 🌀**

HYDRAULIC KNOW-HOW
Optimised hydraulics for a perfect wash-out of Geberit WC ceramics, with water-saving flushing.

WALL-HUNG CONCEALED SOLUTIONS

THE CONCEALED ADVANTAGES

SUSTAINABLE

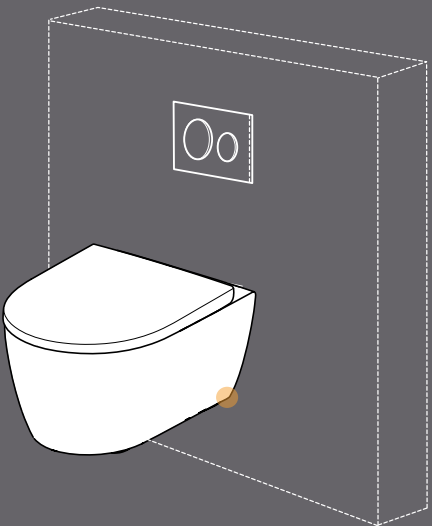

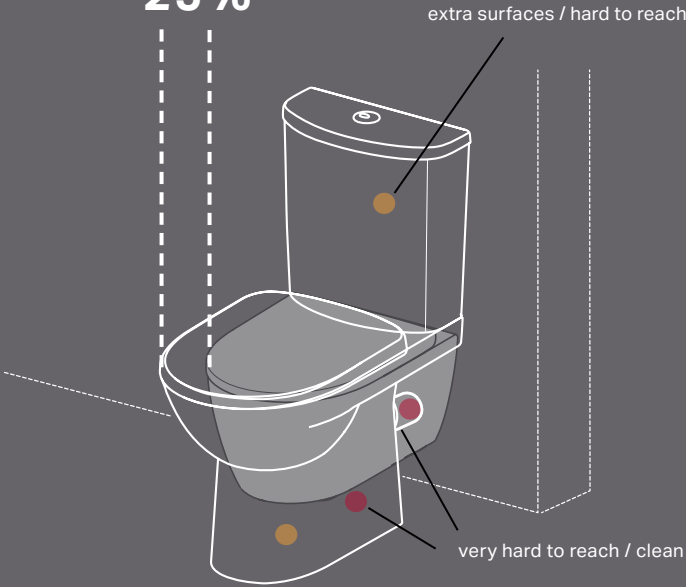

A wall-hung solution needs much less cleaning agent than a floor-standing toilet. You are saving money and you are protecting the environment.

HYGIENIC

Wall-hung toilets have far less corners or edges where dirt, dust and hair can get stuck. Germs have nowhere to hide.

-25%

TIME-SAVING

With a wall-hung solution you clean the toilet much faster.

CONCLUSION

Saving material and time for cleaning means: you save money. Especially in public and semi-public areas like hotels or office buildings this is important.

Exceptional toilet
flush, easy to clean

RIMLESS WCS WITH TURBOFLUSH TECHNOLOGY

OUTSTANDING FLUSH PERFORMANCE GUARANTEED

Geberit hydraulics experts have optimised the entire water flow from the cistern via the WC to the drain. The energy from the concealed cistern is converted into an exceptional toilet flush. The precise control of the water achieves thorough and complete flushing out of the ceramic without oversplashing, resulting in a flushing performance up to ten times better than required by European standards.

Geberit's pioneering TurboFlush flush technology guarantees a flawless, ultra-quiet flush, ensuring immaculate cleanliness with every use. Paired with the Geberit cistern, the Geberit WC ceramic appliance redefines performance and sophistication – setting a benchmark for innovation and elegance in the field of sanitary applications.

↑ The asymmetrical ceramic shape sets the powerful flow rate from the Geberit cistern in a rotating motion. This ensures the full surface of the WC is flushed out thoroughly and quietly.

↑ The completely rimless inner ceramic is aesthetically pleasing and has hardly any concealed areas where deposits could collect.

↑ The innovative TurboFlush technology sets the water in a spiral motion through a lateral flush opening and the asymmetrical ceramic design.

RIMLESS WCS

WITH RIMFREE
FLUSH TECHNOLOGY

Contemporary
standard for hygiene
and ease of care

Geberit Rimfree WC ceramics have no flush rim or splash guard, so there are virtually no hidden corners or edges for dirt and limescale to accumulate. The precise water guide also facilitates full-surface flushing.

The smooth, easily accessible inner surfaces of Geberit Rimfree WC ceramics make light work of cleaning for a clean and hygienic experience.

RIMFREE WC
Limescale and dirt have little chance of sticking to the smooth, rimless ceramic. The inner surface is flushed thoroughly, leaving everything clean in no time at all.

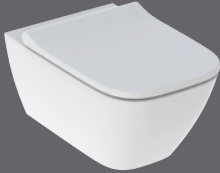

CLASSIC WC WITH FLUSH RIM
Conventional WC ceramic appliances have a flush rim that attracts limescale and dirt and allows unpleasant odours to build up. Keeping this clean calls for a lot more effort.

Geberit iCon wall-hung WC
W 355 mm / D 530 mm

- Simple appearance, flexibility in bathroom design
- Rimless WC ceramic with Rimfree flush technology

GEBERIT QUICK RELEASE

FOLD UP, LIFT OFF AND REPLACE

↑ After folding them up, the seat and lid can be removed from above and put back just as easily.

No toilet is complete without a WC seat ring and a lid: one makes the whole experience more comfortable, while the other contributes to general hygiene and a harmonious overall aesthetic. Quick release models are particularly convenient and easy to clean, as they can be simply detached upwards for cleaning. Discover the additional comfort functions of Geberit WC seats.

↑ Almost all Geberit WC seats are equipped with a practical quick release function. Simply fold up the seat and cover, lift them off, and replace from above after cleaning. That's all there is to it.

← **SOFT-CLOSING MECHANISM**
A special cushioning system for the seat and lid ensures that they close gently and quietly rather than falling shut.

GEBERIT BIDETS

GEBERIT SHOWER TOILETS

MODERN WELL-BEING

Water is an essential part of our daily personal hygiene. It offers a gentle yet thorough clean. This is why more and more people are turning to this natural and beneficial form of toilet hygiene, using water instead of paper after using the toilet. A Geberit AquaClean shower toilet conveniently ensures a sense of cleanliness and well-being, leaving users with a clean, assured and confident feeling all day long at the touch of a button.

GEBERIT AQUACLEAN SHOWER TOILETS

THE FRESH FEELING

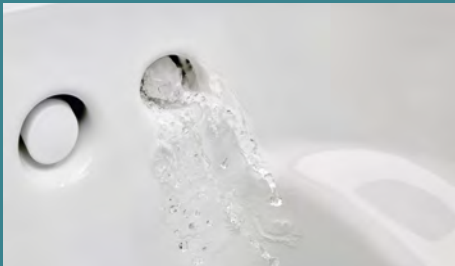

Special sense of well-being and freshness

As the gentlest and most thorough means of cleaning, water takes the spotlight in our pursuit of cleanliness. Everyday tasks illustrate just how important water is when it comes to cleaning. After all, would you really prefer to clean your dirty hands with just dry paper? Geberit AquaClean shower toilets ensure freshness and cleanliness all day long at the touch of a button, not to mention extra comfort depending on the model.

A shower toilet features an integrated shower spray. This offers thorough and gentle cleaning without the use of paper.

The spray arm starts in its well-protected park position. It is automatically rinsed before each use to ensure it is always perfectly clean.

At the touch of a button, the spray arm extends and the shower procedure begins. Seconds later, a pleasant, warm jet of water can be felt. Once the shower procedure is complete, the spray arm is rinsed again and returned to its park position.

A discreet, automatically activated light in seven selectable colours and five brightness levels assists orientation at night. The orientation light is integrated into various Geberit AquaClean shower toilets.

GEBERIT ACTUATOR PLATES

FOR **EVERY** **BATHROOM AESTHETIC**

The Geberit actuator plate is the only part you see of the concealed cistern. It is a piece of design, a decoration item for your bathroom. At the same time it is functional and easy to clean. Whatever needs you have – there is the correct actuator plate. Choose from a wide variety of designs and materials.

GEBERIT ACTUATOR PLATES
**FINISHING
TOUCH**

→ **GEBERIT SIGMA40
CUSTOMISED FINISH**
Customised finishes allow Geberit Sigma40 actuator plates and Typ40 urinal covers to blend seamlessly with the overall aesthetic of bathroom fittings from leading manufacturers.

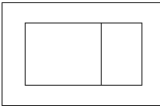

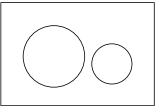

Discover our actuator plate design variety
at www.geberit-global.com/actuatorplates

bold statement
to elevate any
space

Different shapes, in many material and colour combinations, surface-mounted or floating in front of the wall: the Geberit actuator plate series offer the right choice for your bathroom. You can rely on perfect function and easy to clean.

← **ROUND OR SQUARE**
Actuator plates with square or round actuator buttons to suit any bathroom aesthetics.

← **TOUCHLESS**
Sophisticated touchless variants offer solutions for all building projects particularly in semi-public and public areas.

SIGMA ACTUATOR PLATES

The Geberit Sigma actuator plates match the Sigma concealed cisterns from Geberit. Whether in round and square shapes, in many different materials and surfaces or extra-slim look they add a touch of elegance and exclusivity for solutions for all building projects in private, semi-public and public areas.

OMEGA ACTUATOR PLATES

The significantly smaller Geberit Omega actuator plates are ideal for unusual room situations, as they can be mounted for actuation from the front or from above. This is ideal in cases where the WC is installed under a window or a low prewall installation with a shelf surface, for example.

DELTA ACTUATOR PLATES

Geberit Delta actuator plates come in six designs in five different colours. Geberit Delta is a suitable solution for project business and for price-sensitive buildings. It offers a reduced scope of options but nonetheless stands for high quality and reliability.

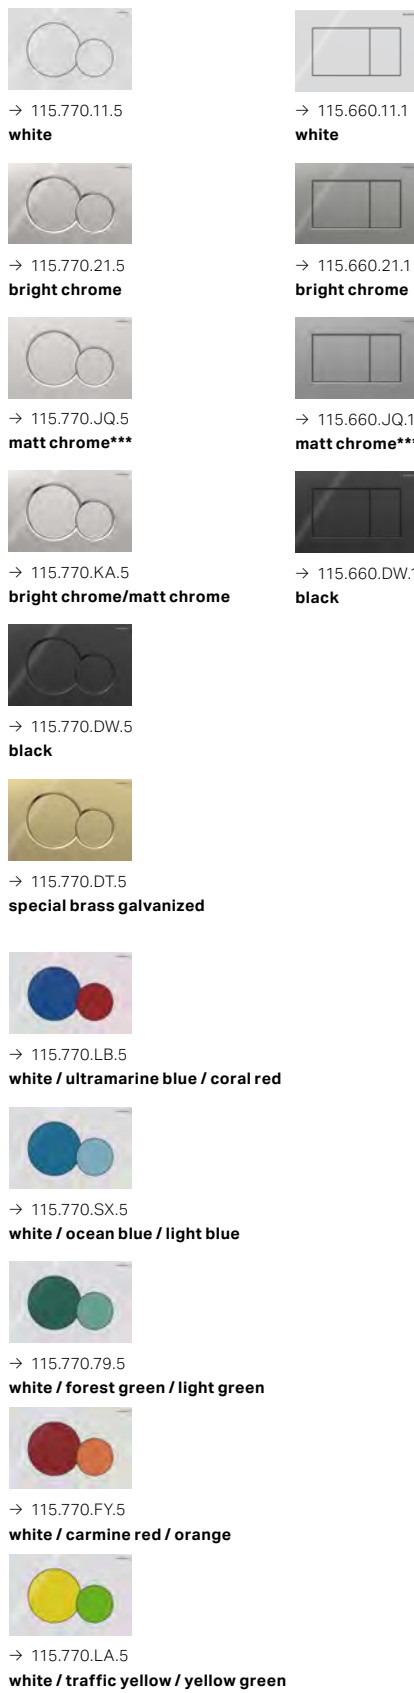

OPTIONS WITH GEBERIT ACTUATORS

	front actuation	top actuation	touchless actuators	customised surface	dual flush	stop-and-go flush	metal	glass	plastic	natural surfaces	matt black / white	vandal-resistant options	illuminated buttons	odour extraction	easy-to-clean coated

GEBERIT REMOTE FLUSH ACTUATION

PLACE IT FREELY

Geberit Remote flush actuators can be installed within a radius of up to 1.70 metres around the WC. This makes it convenient to actuate the flush even when seated. They can be combined with a normal actuator on the concealed cistern or installed as a stand-alone solution.

GEBERIT DUOFRESH

SIMPLY BREATHE DEEPLY

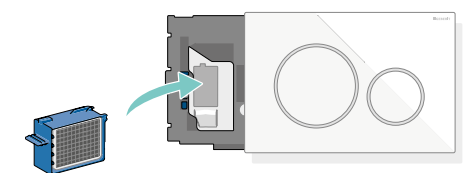

beneficial treat
for all senses

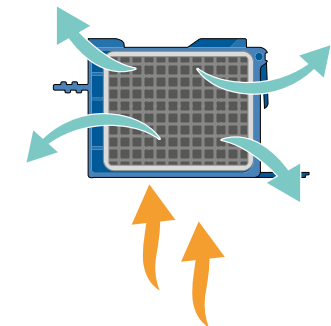

The Geberit DuoFresh odour extraction unit removes unpleasant odours directly from the WC ceramic appliance before they can spread throughout the bathroom. It can be combined with most Geberit actuator plates, making it suitable for virtually any bathroom aesthetic.

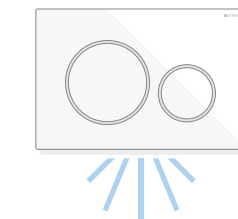

↑
Unpleasant odours are removed right where they form.

↑
The ceramic honeycomb filter is readily accessible behind the actuator plate.

↑
The ceramic honeycomb filter cleans the air thoroughly. A quiet fan blows the cleaned air back into the room.

↑
The LED orientation light is provided for additional convenience. This is located below the actuator plate and radiates a discreet, indirect light into the room – a simply perfectly thoughtout addition.

GEBERIT WASHBASIN TAPS

AESTHETICALLY
PLEASING AND WELL
THOUGHT OUT

Wall-mounted taps
create space around
the washbasin

Well-matched bathroom fittings complement the chosen bathroom style and create a striking visual highlight. Geberit washbasin taps impress with their sleek design and outstanding functionality. They are designed for use in both private bathrooms and public sanitary facilities.

↑
DESIGNED FOR PRIVATE BATHROOMS
The Geberit ONE wall-mounted taps are renowned for their timeless design and ease of use which make them a compelling choice. The water volume and temperature can be set using two turn handles on either side of the tap, making operation just as easy as with a single-lever mixer.

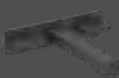

↑
FOR PUBLIC SANITARY ROOMS
Touchless washbasin taps are mainly used in sanitary facilities in public and semi-public buildings, such as airports, shopping centres, schools and restaurants. Given the high footfall in these locations, they have to be robust, reliable and capable of withstanding heavy use – including occasional rough treatment.

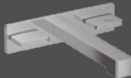

↑
WALL-MOUNTED TAPS IN TWO LENGTHS
The Geberit Piave and Brenta models make a striking impression with their ultra-slim and timelessly elegant design. Both are available as wall-mounted or deck-mounted taps and can be combined with virtually any washbasin design. The wall-mounted taps are supplied in lengths of 170 mm and 220 mm to accommodate the wide range of possible combinations.

MIRRORS AND MIRROR CABINETS

RAYS OF LIGHT IN THE BATHROOM

Close to yourself: looking in the mirror is as much a part of the bathroom as washing your hands and brushing your teeth. It's nice when illuminated mirrors and mirror cabinets show people and their washbasin in the right light.

GEBERIT COMFORTLIGHT

PERFECT FOR YOUR DAILY ROUTINE

Light has a significant impact on our general well-being. White, bright light is perfect for waking you up, while a muted, warm light has a more relaxing effect.

THE BRIGHTNESS OF THE GEBERIT ONE MIRROR CABINETS CAN BE DIMMED ALONG WITH THE LIGHT COLOUR.

The sanitary products and bathroom furniture featuring Geberit ComfortLight offer a unique feature by adjusting the colour temperature based on the surrounding brightness: the continuously adjustable dimming function automatically makes brighter light cooler and darker light warmer. These lighting conditions are based on natural daylight and are designed to create a cosy ambience. A total of four different, harmoniously coordinated light sources set the perfect scene not only for the washplace, but for the bathroom as a whole. They also create an authentic mirror image without casting distracting shadows.

↑
STANDARD LIGHT
Glare-free light for everyday routines at the washplace.

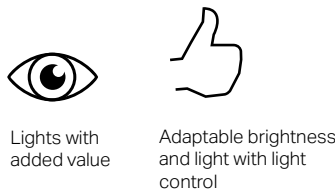

↑
WORKING LIGHT
Bright and very clear illumination for intensive beauty care.

↑
INDIRECT LIGHTING
Discreet, warm lighting for relaxing hours spent in the bathroom.

↑
ORIENTATION LIGHT
A soft light that shows the way to the washplace at night and makes it easier to fall back asleep.

GEBERIT CLEANLINE30

MODERN AND FUNCTIONAL DOWN TO THE FINEST DETAIL

Geberit CleanLine30 shower channels are sleek, functional and sophisticated, down to the finest detail. Made of stainless steel, they combine modern design with maximum everyday practicality. The narrow shower channel fits elegantly into any shower surface – either mounted back-to-wall or in-centre.

↑
Installed either back to wall or in centre, the shower channel can be customized to the width of the showering area and is suitable for large tile sizes.

←
The comb insert is easily removable by pressing a button and does not require any additional tools. It catches dirt and hair and is easy to clean.

SHOWER CATEGORY

GEBERIT CLEANWALL
FOR AN **AESTETIC,
BARRIER-FREE SHOWER
SURFACE**

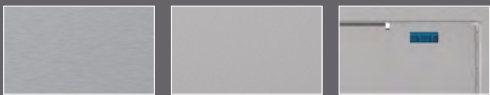

↑ Both the drinking water and waste water installations are behind the wall, and the floor can be tiled throughout without being interrupted by visible drains. This also makes it possible to install continuous underfloor heating.

COLOURS

white alpine black matt bright chrome-plated

brushed stainless steel polished stainless steel profile for flush wall tiling

Floor-even access for completely tiled shower areas

uninterrupted space

Geberit CleanWall moves the drainage system for floor-even showers from the floor to the wall, which not only looks great, but also makes it easier to install a floor-even shower.

↑ The cover of the wall drain can also be tiled to match your bathroom design.

↑ The optionally installable collector profile directly in front of the wall supports the slope and collects dirt and deposits so that they can be readily washed away.
